

ROBERT FARBER

ICONIC IMAGES

Farber's unique diversity in subject, whether it be nudes or moods from seascapes to cityscapes, fashion or advertising has always been captured in his signature painterly, romantic style.

Today there are tens of thousands of serious photographers seeking new interpretations of the beauty of the female form. There is but a handful whose work truly interests us by revealing different ways of seeing and understanding this beauty. Robert Farber is one of the very few who is able to delight and please us in this elusive approach to nature. From abstraction to realism he reveals to us his love of the female form. His delightful and beautiful photographs offer a unique pleasure." -

Arnold Newman, April, 2001
